

We are the leaders in delivering end-to-end compliant systems for component storage & transport.

- > Safe and compliant logistics engineering
- > Quality storage solutions
- > Effective asset preservation

WHY DAYWALK®

We are the **leaders** in delivering **end-to-end compliant** systems for component storage & transport.

Reliable
and trusted
for over 20
years

Superior
engineering
capabilities and
standards

Innovative
solutions to
unique
problems

**National
Footprint**
for even the
largest projects

Easy
to deal with and
responsive at
every step

Extensive
support and
end-to-end
training

ABOUT US

LEARN MORE

THE DAYWALK®

DIFFERENCE

Designed for **transport** - not just structural
Independently **certified** - you have complete assurance
End-to-end **guidance** - for assembly and load restraint

DAYWALK solutions can help you comply to:

Australian
Standards

HVNL
Heavy Vehicle
National Law

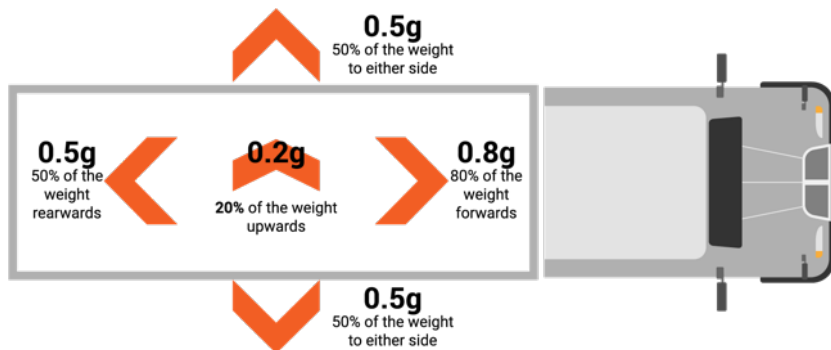

Wind
Loading

Materials
Handling

The Performance Standards in the Load Restraint Guide

DAYWALK BeAssured ®

TRANSPORT

SAFE AND COMPLIANT TRANSPORT ENGINEERING

Your Challenges

Meeting legal obligations around the Chain of Responsibility

Transporting multiple sizes of components or complex loads.

Looking to mitigate costs in the long run and not compromise on safety.

STEEL PALLETS **AND ACCESSORIES**

- ✓ Ideal for transporting heavy equipment
- ✓ Adjustable and compliant to Emergency Braking in Transport (EBiT)
- ✓ Patented system that's safer than timber frames or pallets
- ✓ Compatible with the DAYWALK Modular Bolting and chocking accessories

STEEL PALLET ACCESSORIES

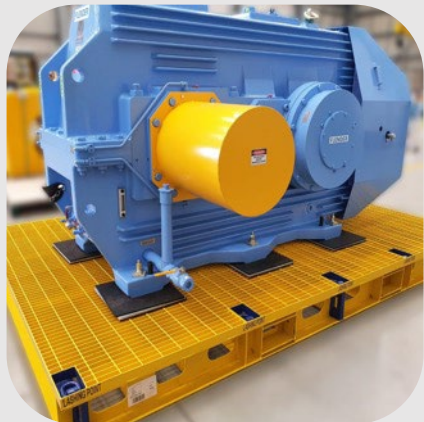

Hold-down bolts

- ✓ Safely and efficiently bolt items to Daywalk steel pallets
- ✓ Easy two-step push-and-twist installation
- ✓ Custom sizes and nyloc nut options available

Spreader plate

- ✓ Rubber inserts help distribute load weight safely
- ✓ Galvanised steel engineered for transport
- ✓ Prevents crushing during emergency braking

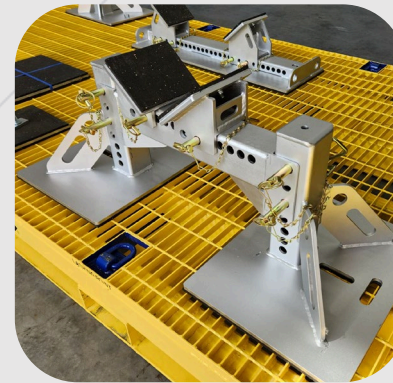

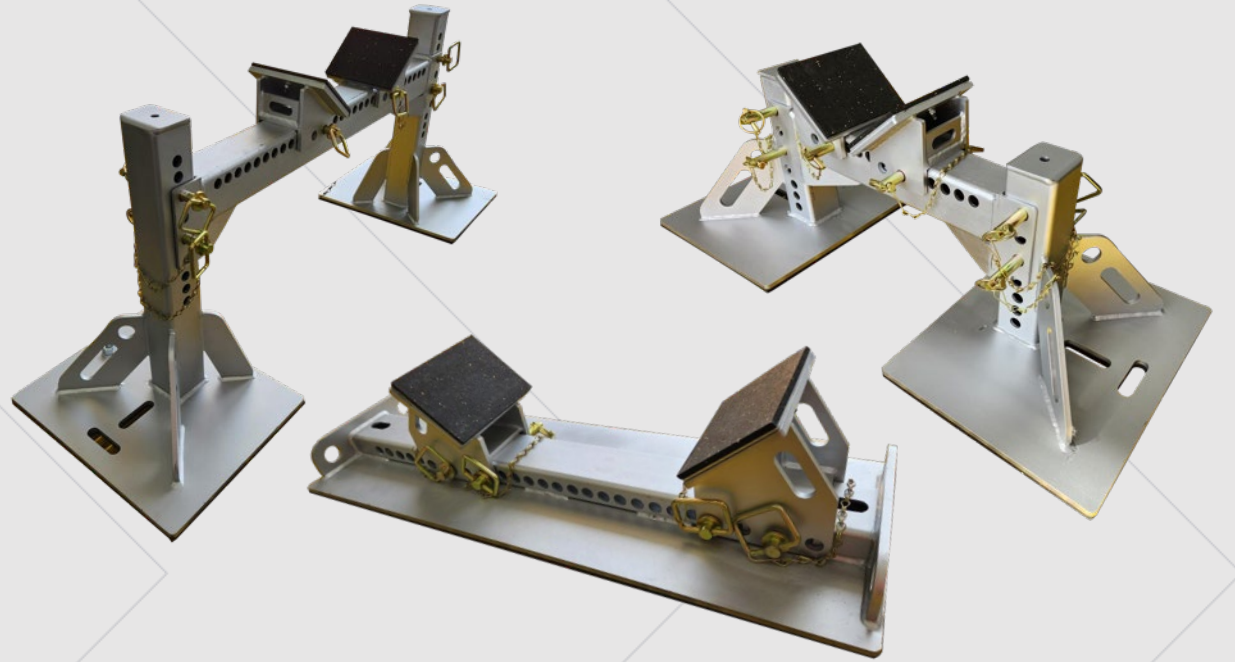

Friction-rated rubber

- ✓ Friction rated for transport
- ✓ Available in multiple pre-cut sizes
- ✓ Stocked nationally

STEEL PALLET STANDS AND CHOCKING ATTACHMENTS

- ✓ Support cylindrical items during transport
- ✓ Load-resistant rubber lining minimises friction
- ✓ Adjustable rail for different component sizes

MODULAR CYLINDER SOLUTIONS

Australian Patent No. 2021102166 & 2022209297

- ✓ Unique and secure system for cylindrical components
- ✓ Adaptable for different item diameters
- ✓ End-stoppers for safety and drip tray for oil capture

400kg WLL, to suit cylinders 1200mmL

800kg WLL, to suit cylinders 2100mmL

3000kg WLL, to suit cylinders 2200mmL

TRANSPORTA[®] SOLUTIONS

Australian Patent App 2022200310

- ✓ Best-in-class integrated transport frame for high value spares
- ✓ Complete protection and logistics certified
- ✓ Multiple sizes available up to 20T+

[LEARN MORE](#)

MULTI-PORTA[®] SOLUTIONS

- ✓ Adjustable transport frame for high value spares
- ✓ Logistics certified and includes QR coded system
- ✓ Stackable empty
- ✓ Multiple sizes available up to 20T+

DAYWALK BeAssured ®

STORAGE

QUALITY STORAGE OPTIONS

Durable cages, stillages and pallets made for the toughest environments.

Your Challenges

Minimising inefficiency and maximising usable warehousing space.

Reducing unsafe and difficult-to-manage storage practices (e.g. Timber)

Looking for economical and readily available alternatives

STEEL CAGES AND STILLAGES

- ✓ Tough and ideal for heavier components and storing multiple SKUs
- ✓ Designed for Australian pallet racking – with easy access
- ✓ Galvanised, stackable and collapsible options available

XYPHOS™

by DAYWALK BeAssured 

For a safer and greener supply chain

Your Challenges

Timber pallets have a one-time indicative rating
No official certification

Timber is scarce and unsustainable

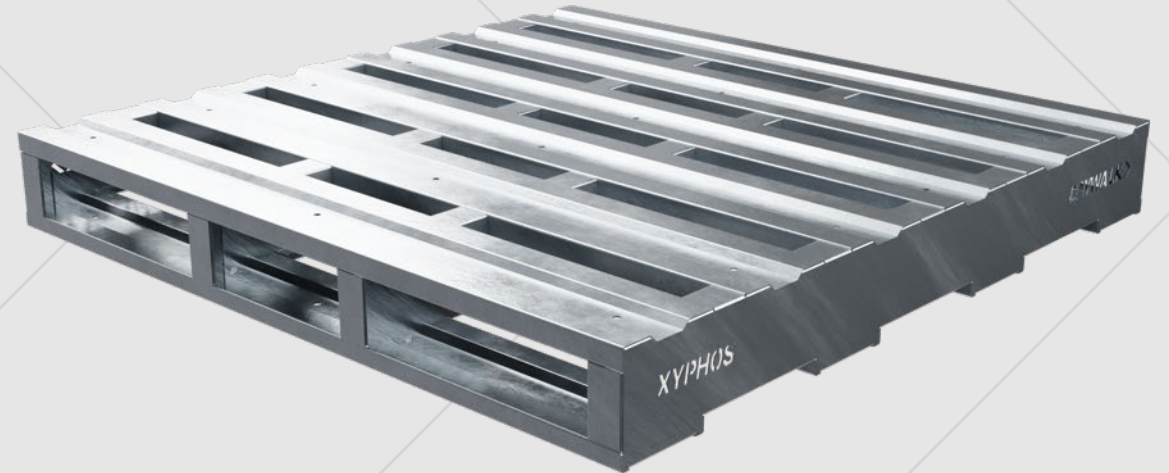

Ongoing timber price increases and costly supply issues

XYPHOS™

by DAYWALK BeAssured 

- ✓ The long lifespan and durability of XYPHOS™ pallets make them a more sustainable option
- ✓ Guaranteed safer storage and transport
- ✓ Protection from timber price increases

TIMBER PALLETS AND COLLARS

- ✓ Ideal for exporting – no heat-treating required
- ✓ Suitable for forklifts and pallet jacks, with UV-Stabilisation for long-term storage
- ✓ Collapsible and stackable options available

13-PCL1165

13-PCS1165

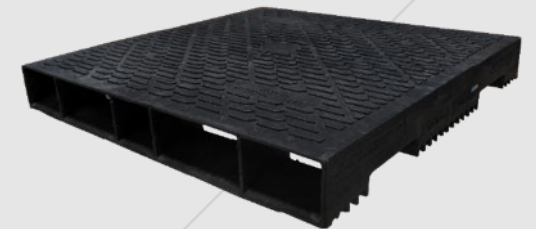

Lids, Dividers & other accessories available

PLASTIC PALLETS AND BINS

- ✓ Flexible and affordable way to store items
- ✓ Double pallets ideal for longer, larger gear
- ✓ Stenciling available for site identification

13-CSB1165/SVUR/R

13-NS900

STRAPPING AND RESTRAINTS

- ✓ Recyclable PET for fast-paced, and high-volume operations
- ✓ Polywoven for round or oddly-shaped items
- ✓ Reusable camlock straps to save time and money in storage

DAYWALK BeAssured ®

PRESERVATION

EFFECTIVE ASSET PRESERVATION

Stop Needless waster of your most valuable assets.

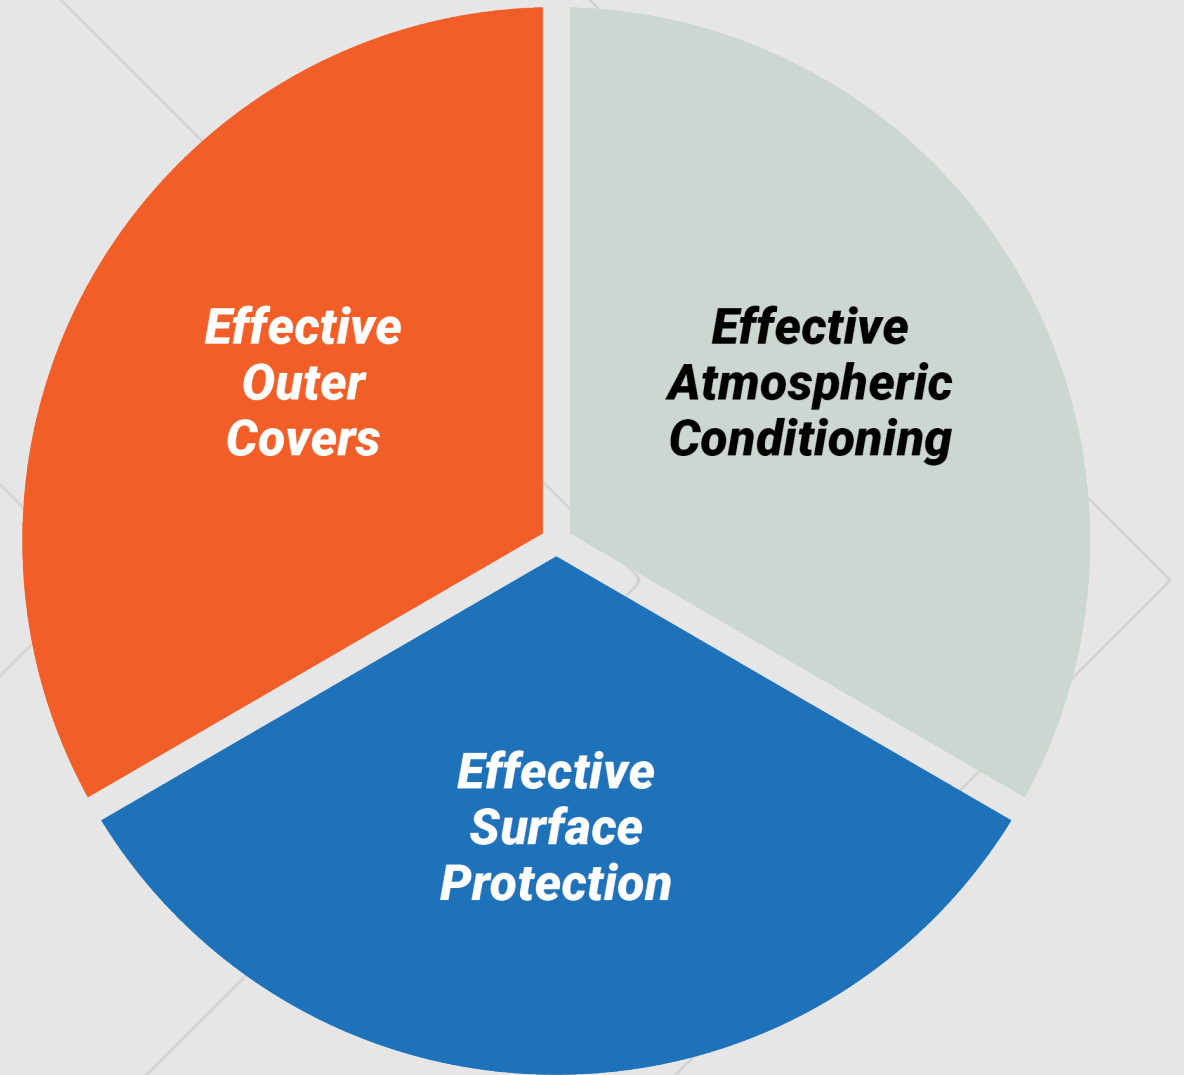

Your Challenges

Preventing moisture that leads to corrosion of your critical components

Protecting your equipment from adverse weather, dust and contaminants

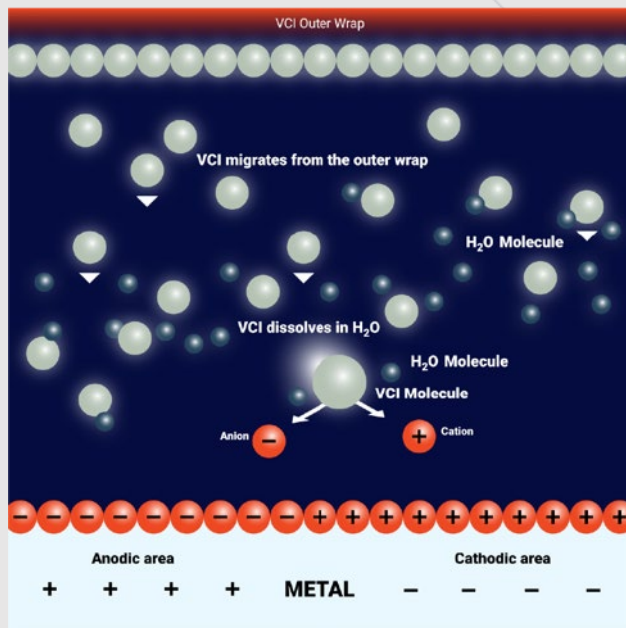

Reducing cost and waste associated with plastic wrapping

***OUR THREE-STEP
PRESERVATION
MODEL***

WHAT IS eVCI®?

- ✓ Scientifically Proven
- ✓ Self-replenishing & re-healing
- ✓ A system that works

CASE STUDY

CHALLENGE

The client wanted to determine the best preservation method for its components – to reduce corrosion during storage and transport.

Originally employing Reactive Copper Technology, the company compared this option with Daywalk’s Volatile Corrosion Inhibitor (eVCI) solution, to see whether the eVCI technology represented an **effective alternative** to protect its components.

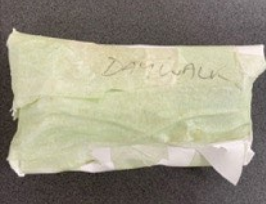

TEST

The company tested the preservation methods on two C175 engine lifting pins.

COPPER FILM

UV-VCI FILM

RESULT

After six weeks, the company unwrapped and compared the components.

COPPER FILM

VISIBLE CORROSION

UV-VCI FILM

NO CORROSION
